- 인트로 페이지

초안

[프롬프트]

bitcoin analysis app UI, blue color, simple, mobile screen

[변경이유]

- 초안은 너무 추상적이어서 GPT Craft 브랜드와 AI 실시간 비트코인 분석 앱의 정체성이 약했다.

[결과 차이 / 개선점]

- 단순 코인 앱처럼 보일 가능성이 있어, 브랜드명·앱 목적·모바일 화면 비율·핀테크 톤을 구체화할 필요가 있었다.

수정안

[프롬프트]

GPT Craft, AI real-time Bitcoin analysis system, mobile app UI, 9:16 portrait, premium fintech dashboard, Figma-style high-fidelity UI mockup, dark navy / black-blue gradient background, white text, electric blue accents, subtle green/red finance indicators, trustworthy, clean, professional, modern, data-driven design, rounded cards, soft glow, subtle glassmorphism, neat spacing, iPhone-style frame, readable English UI labels, clean typography, no gibberish, no distorted text.

[변경이유]

- 세 화면이 서로 다른 앱처럼 보이지 않도록 공통 스타일 기준을 먼저 정리했다.

[결과 차이 / 개선점]

- 다크 네이비, 블루 포인트, 글래스모피즘 카드, Figma 스타일 목업 방향이 고정되었다.

최종안

[프롬프트]

Create a high-fidelity mobile app intro screen UI for “GPT Craft”, an AI real-time Bitcoin analysis system. Design it as a premium fintech app in a 9:16 portrait mobile screen, with an iPhone-style mockup frame.

Use a dark navy to deep blue gradient background, white typography, and bright blue accent colors.

The mood should feel trustworthy, professional, calm, clean, and modern.

Screen purpose: intro / onboarding / start screen.

Include:

- top area with the GPT Craft logo icon and app name "GPT Craft"
- subtitle: "AI Real-time Bitcoin Analysis"
- a short one-line brand message such as: "Trusted data-driven Bitcoin intelligence"
- a visually elegant hero section with Bitcoin-themed analytics visuals, subtle chart lines, glowing particles, and abstract AI/finance graphics
- a small information block showing that analysis runs 4 times a day:
 - 12:00 AM
 - 6:00 AM
 - 12:00 PM
 - 6:00 PM
- a short explanation text like: "AI analyzes the market every 6 hours after major market sessions."
- one large primary CTA button near the bottom:
 - "Start Analysis"
- one secondary subtle button or text link:
 - "Explore Features"
- bottom safe area spacing like a real app onboarding screen

Visual style:

- rounded cards
- subtle glow
- premium fintech look
- clean Figma-style layout
- minimal clutter
- balanced spacing
- polished mobile UI presentation

Important:

- keep text readable and clean
- do not use garbled letters
- make it look like a real product design mockup
- emphasize a professional AI + Bitcoin + analytics identity

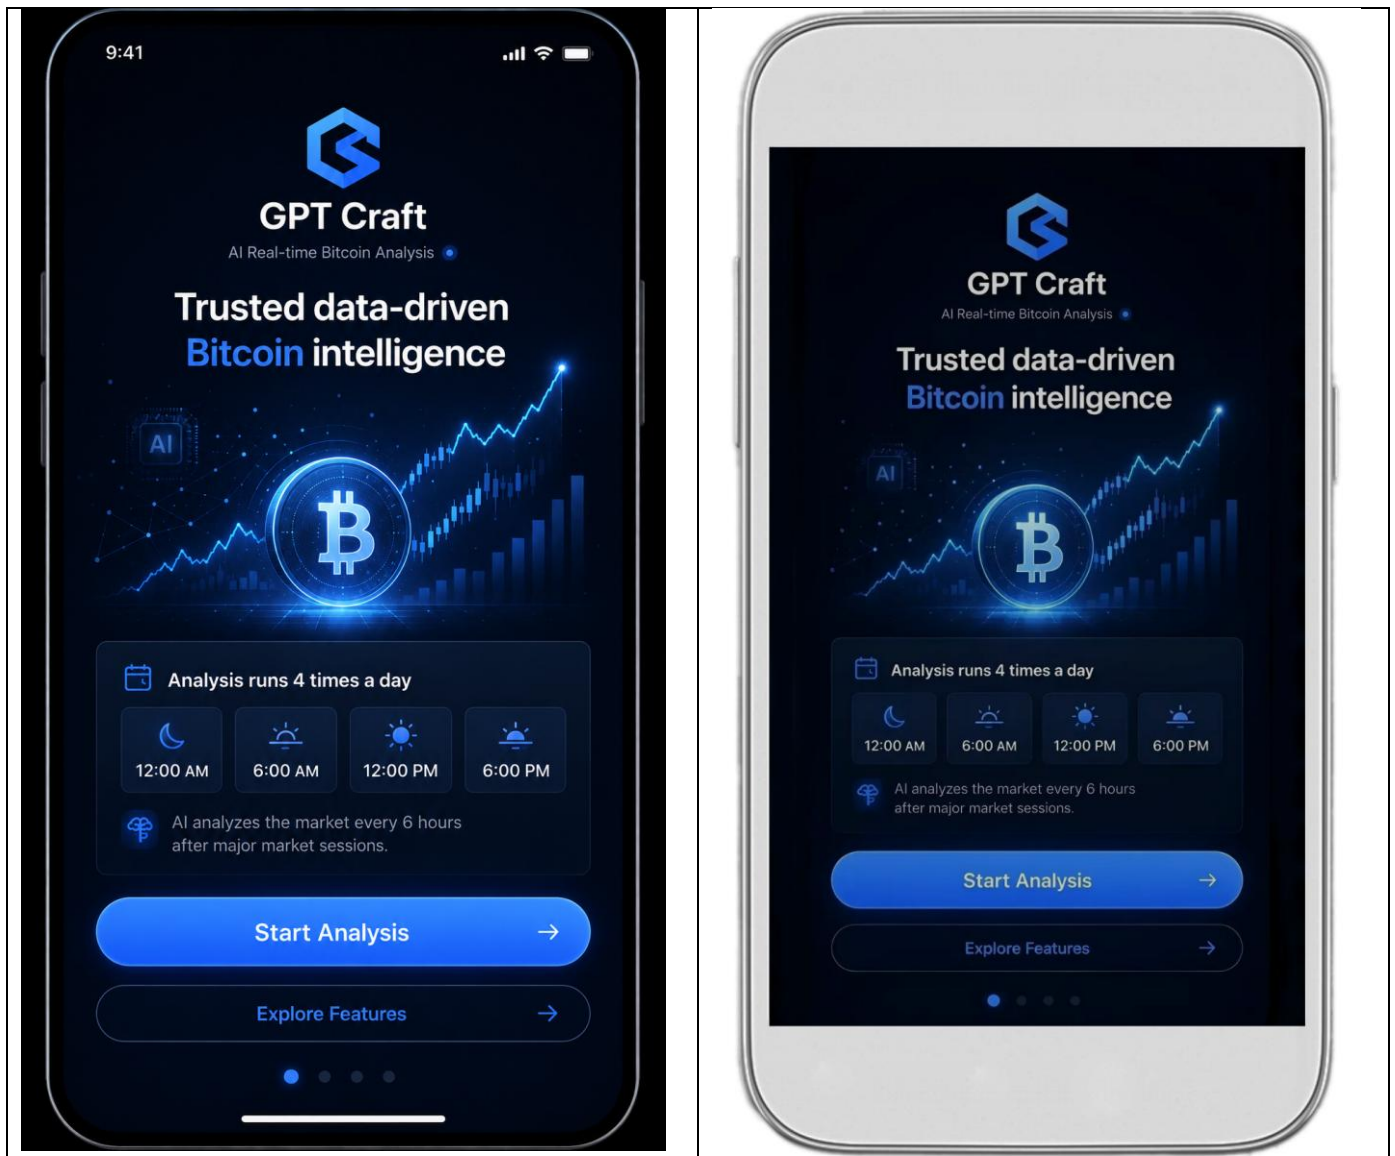

[변경이유]

- 인트로 화면에서 서비스명, 핵심 메시지, 1 일 4 회 분석 주기, 시작 버튼을 명확히 보여주기 위해 최종 프롬프트를 작성했다.

[결과 차이 / 개선점]

- Start Analysis 버튼을 통해 다음 화면으로 이동하는 앱 흐름이 생겼다.

디자인목업안

- 전체 메뉴 / 최근 BTC 분석 요약 화면

초안

[프롬프트]

Professional mobile fintech app UI for GPT Craft, AI real-time Bitcoin analysis system, dashboard layout, BTC price chart, AI signal summary, watchlist, bottom navigation.

[변경이유]

- 초기 대시보드 방향은 기능이 많아 보였으나 ETH, SOL 등 비트코인 외 자산이 포함되어 팀장 피드백의 비트코인 집중 방향과 맞지 않았다.

[결과 차이 / 개선점]

- 기존 대시보드형 2 번 화면은 최종 구성에서 제외하기로 했다.

수정안

[프롬프트]

Create a high-fidelity mobile app detailed analysis screen UI for “GPT Craft”, an AI real-time Bitcoin analysis system.

Design it in a 9:16 portrait mobile screen with a premium iPhone-style UI mockup.

Use a dark navy and deep blue gradient background, white text, blue accent highlights, and selective green/red indicators for financial values.

The design should feel professional, trustworthy, elegant, and data-rich, like a real Figma fintech app interface.

Screen purpose: detailed analysis page after selecting a dashboard menu item.

Include these key sections clearly:

- Header: back arrow, title “BTC Analysis”, subtitle “Detailed AI Market Report”, updated time

- Top summary card: current BTC price, Bullish/Neutral badge, confidence label, mini summary line
- Section 1: 3-Day Forecast with chart and projected range
- Section 2: Confidence with score visualization
- Section 3: News Analysis with compact news cards
- Section 4: Fear & Greed Analysis with gauge chart
- Section 5: Technical Analysis with RSI, MACD, Moving Average, Volume, Support / Resistance
- Action section with Suggested Action, Entry Zone, Target Price, Stop Loss, Risk Level
- Bottom sticky button: "View Full Report"

Visual requirements:

premium fintech interface, structured information hierarchy, clean chart presentation, rounded cards, subtle glassmorphism, readable English labels, no garbled or broken text, consistent GPT Craft branding, modern crypto analytics app style.

[변경이유]

- 팀장 의견에 따라 기존 세부 분석 화면을 1 일 4 회 분석 중 최근 분석 요약 화면으로 재배치했다.

[결과 차이 / 개선점]

- 화면 2 는 최근 BTC 분석 요약 및 Full Report 진입 화면 역할을 맡게 되었다.

최종안

[프롬프트]

Edit this existing mobile UI image.

Keep the entire original design unchanged as much as possible.

Only change the top-left navigation button.

Replace the current back arrow icon in the top-left rounded square button with a clean app menu icon that matches the GPT Craft UI style.

The new menu icon should look like a modern hamburger menu or app navigation menu icon:

- three clean horizontal lines
- white or light blue icon color
- placed inside the existing rounded glassmorphism square button
- consistent with the dark navy fintech UI style
- same size, position, glow, border, and visual weight as the original button

Do not change any other part of the image.

Do not modify:

- layout
- charts
- text
- numbers
- colors
- cards
- buttons
- bottom button
- Bitcoin price
- report sections
- typography
- background
- device frame

The final result should look almost identical to the original image, except that the top-left button now clearly works as an app menu button for opening the App Menu screen.

This is an image edit task, not a redesign. Preserve the original UI exactly and only replace the top-left back arrow with a matching menu icon.

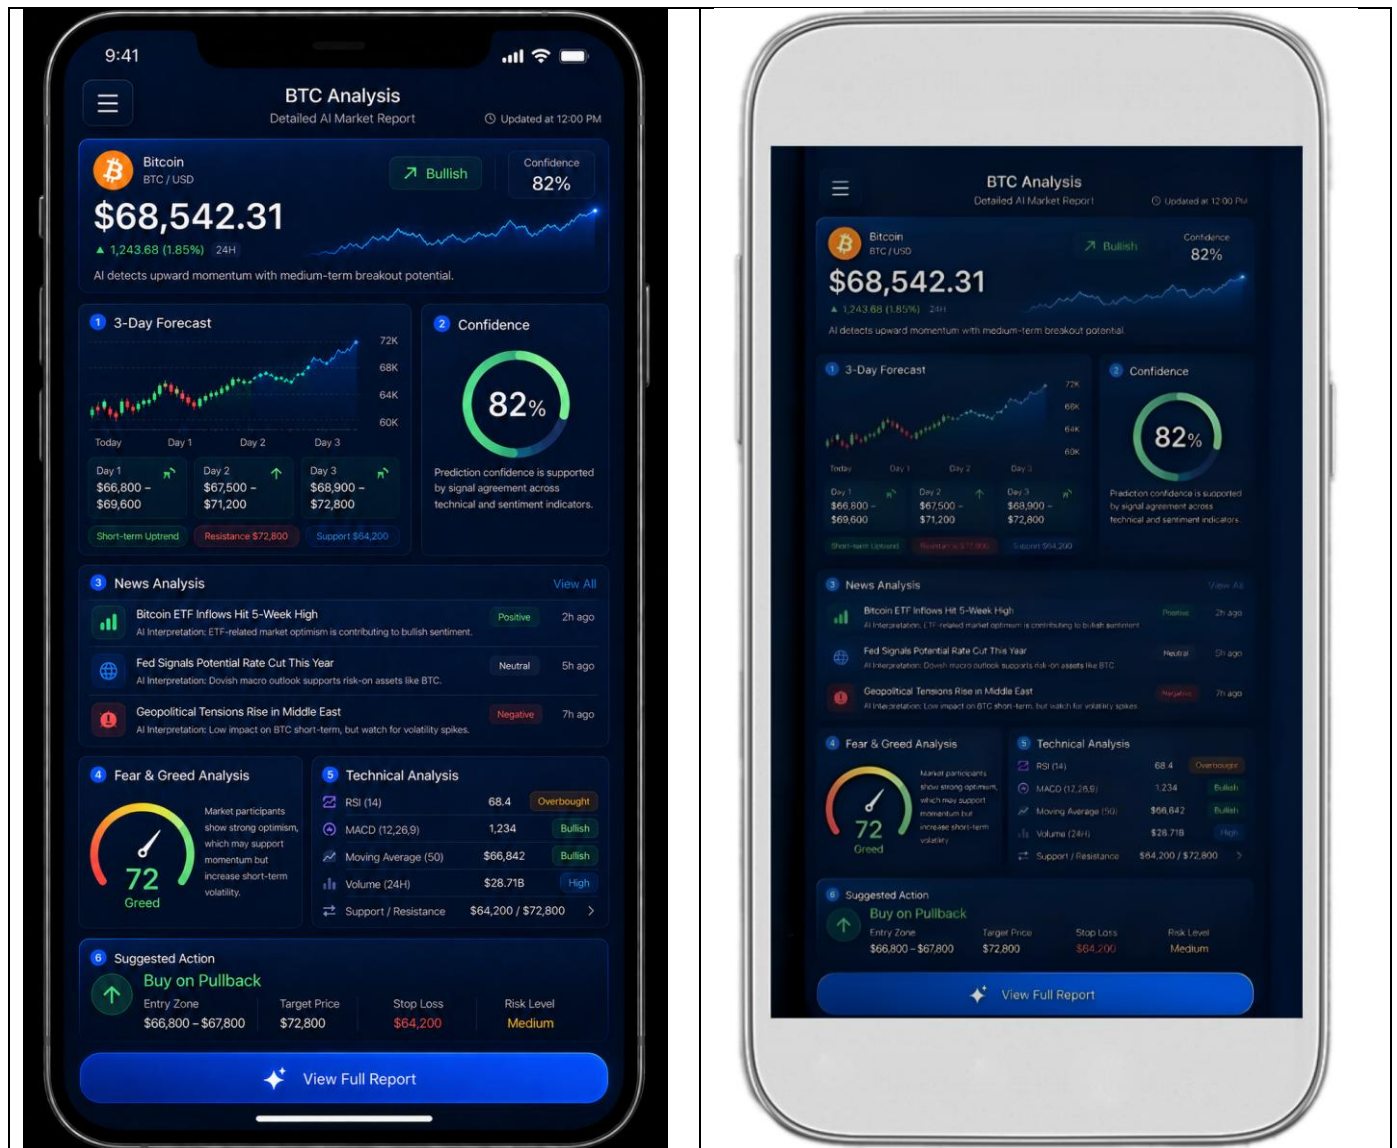

[변경이유]

- Figma 에서 App Menu 후보 화면으로 연결하기 위해 좌측 상단 뒤로가기 버튼을 메뉴 아이콘으로 변경했다.

[결과 차이 / 개선점]

- 화면 2 에서 메뉴 아이콘은 App Menu 후보 화면으로, View Full Report 버튼은 세부 리포트 화면으로 연결할 수 있게 되었다.

디자인목업안

기존 세부 분석 이미지를 최근 분석 요약 화면으로 재배치하고, 메뉴 아이콘을 추가한 최종 버전

- 메뉴 실행시 세부 페이지 구성 / BTC Full Report

초안

[프롬프트]

BTC detailed analysis page with forecast, confidence, news analysis, fear and greed, technical analysis.

[변경이유]

- 초안은 세부 항목만 나열되어 팀장이 제시한 하락 전망, 가격 범위, Extreme Fear, 기술지표 해석 흐름이 부족했다.

[결과 차이 / 개선점]

세부 리포트의 실제 분석 내용과 방향성을 더 구체적으로 넣을 필요가 있었다

수정안

[프롬프트]

Focus only on Bitcoin. Use short bias, expected change -1.5% ~ -4.0%, expected price range \$60,500 ~ \$64,500, confidence Medium 68%, Fear & Greed Index 17, and technical indicators.

[변경이유]

- 팀장이 제공한 3-Day Trend, Confidence, News Analysis, Fear & Greed, Technical Analysis 내용을 반영했다.

[결과 차이 / 개선점]

- 비트코인 외 자산을 제거하고, 세부 분석 리포트의 판단 근거가 더 명확해졌다.

최종안

[프롬프트]

Create a high-fidelity mobile app full report screen UI for “GPT Craft”, an AI real-time Bitcoin analysis system.

Design it as a premium fintech mobile app in a 9:16 portrait screen with an iPhone-style mockup frame.

Use the same visual style as the previous GPT Craft screens:

dark navy and deep blue gradient background, white typography, electric blue accent colors, rounded glassmorphism cards, subtle glow, clean fintech dashboard style, readable English UI labels, no garbled text.

Screen purpose:

This is the detailed full report page that appears after the user taps “View Full Report” on the recent BTC analysis summary page.

Important:

Focus only on Bitcoin. Do not include Ethereum, Solana, altcoin watchlists, portfolio features, or unrelated coins.

Header:

- back arrow
- title: BTC Full Report
- subtitle: AI Market Analysis
- updated time: Updated at 12:00 PM

Top summary card:

- Bitcoin 3-Day Trend
- Direction: Short
- Expected Change: -1.5% ~ -4.0%

- Expected Price Range: \$60,500 ~ \$64,500
- Confidence: Medium 68%
- Market Status: Weak Momentum

Main report sections:

Create a clean scroll-style report layout with stacked cards.

Section 1: 3-Day Forecast

- Trend Direction: Short
- Expected Change: -1.5% ~ -4.0%
- Expected Price Range: \$60,500 ~ \$64,500
- Summary Reasoning:

price remains below EMA and BBM, stochastic and StochRSI are weakening, MACD histogram is shrinking

Section 2: Confidence

- Level: Medium, 68%
- Key Signals:

Stochastic %K below %D

Close below EMA and BBM

StochRSI falling from overbought zone

macro and ETF news sentiment remains negative
- Risks:

Extreme fear may trigger short-covering rebound near \$60,500 support

Section 3: News Analysis

- Overall news flow is bearish
- Tech stock selloff, ETF outflows, options expiry, Fed uncertainty, and risk-off sentiment increase downside pressure

Section 4: Fear & Greed Analysis

- Fear & Greed Index: 17
- Status: Extreme Fear

- Interpretation:

sentiment is very weak, but oversold rebound risk exists

Section 5: Technical Analysis

Create compact technical indicator cards:

- Stochastic: Bearish
- MACD: Weak recovery
- EMA & BBM: Price below average
- %B: Neutral to bearish
- StochRSI_K: Momentum cooling
- Divergence: No clear bullish divergence

Bottom action card:

- AI View: Cautious Short Bias
- Key Support: \$60,500
- Key Resistance: \$64,500
- Risk Note: Avoid chasing shorts near extreme fear levels

Visual requirements:

- more text-report focused than chart-heavy
- clean readable report cards
- premium professional fintech look
- consistent GPT Craft branding
- realistic Figma mobile UI mockup
- no distorted typography
- no gibberish

[변경이유]

- View Full Report 클릭 후 진입하는 텍스트 중심의 상세 리포트 화면으로 구성하기 위해 최종 프롬프트를 작성했다.

[결과 차이 / 개선점]

- 화면 2 는 요약, 화면 3 은 상세 리포트로 역할이 분리되었다.

디자인목업안

- 전체 메뉴 실행시 App Menu 세부 페이지(Figma 연결을 위해 추가)

추가 이미지안

[프롬프트]

Create a high-fidelity mobile app hamburger menu screen UI for “GPT Craft”, an AI real-time Bitcoin analysis system.

Design it as a premium fintech mobile app in a 9:16 portrait screen with an iPhone-style mockup frame.

Use the same visual style as the previous GPT Craft screens:

dark navy and deep blue gradient background, white typography, electric blue accent colors, rounded glassmorphism cards, subtle glow, clean fintech dashboard style, readable English UI labels, no garbled text.

Screen purpose:

This is the app-level hamburger menu screen opened from the recent BTC analysis summary page.

It should not look like a report table of contents.

It should look like a real app navigation menu with settings, history, alerts, and report actions.

Important:

Focus only on Bitcoin.

Do not include Ethereum, Solana, altcoin watchlists, portfolio features, or unrelated coins.

Header:

- close icon
- GPT Craft logo
- title: App Menu
- subtitle: Bitcoin AI Analysis System

Top status card:

- Latest Analysis: Updated at 12:00 PM
- Market Bias: Cautious Short
- Confidence: 68%
- Next Update: 6:00 PM

Main menu section:

Create clean rounded menu cards in a vertical list.

Menu items:

- Recent BTC Summary
Description: Latest AI market snapshot
- Full Report
Description: Detailed Bitcoin analysis report
- Analysis History
Description: Review previous AI reports
- Alert Settings
Description: Manage price and signal alerts
- Analysis Schedule
Description: 12AM, 6AM, 12PM, 6PM updates
- Data Sources
Description: News, sentiment, and technical indicators
- Export Report
Description: Save or share analysis result
- App Settings
Description: Preferences and account options

Each menu item should include:

- simple line icon
- short title
- one-line description
- small arrow indicator

Bottom trust message:

- Trusted data. Real-time insights. Smarter decisions.

Visual requirements:

- app-level navigation menu
- not chart-heavy
- not a detailed report page
- premium professional fintech look
- consistent GPT Craft branding
- realistic Figma mobile UI mockup
- readable English labels
- no distorted typography
- no gibberish

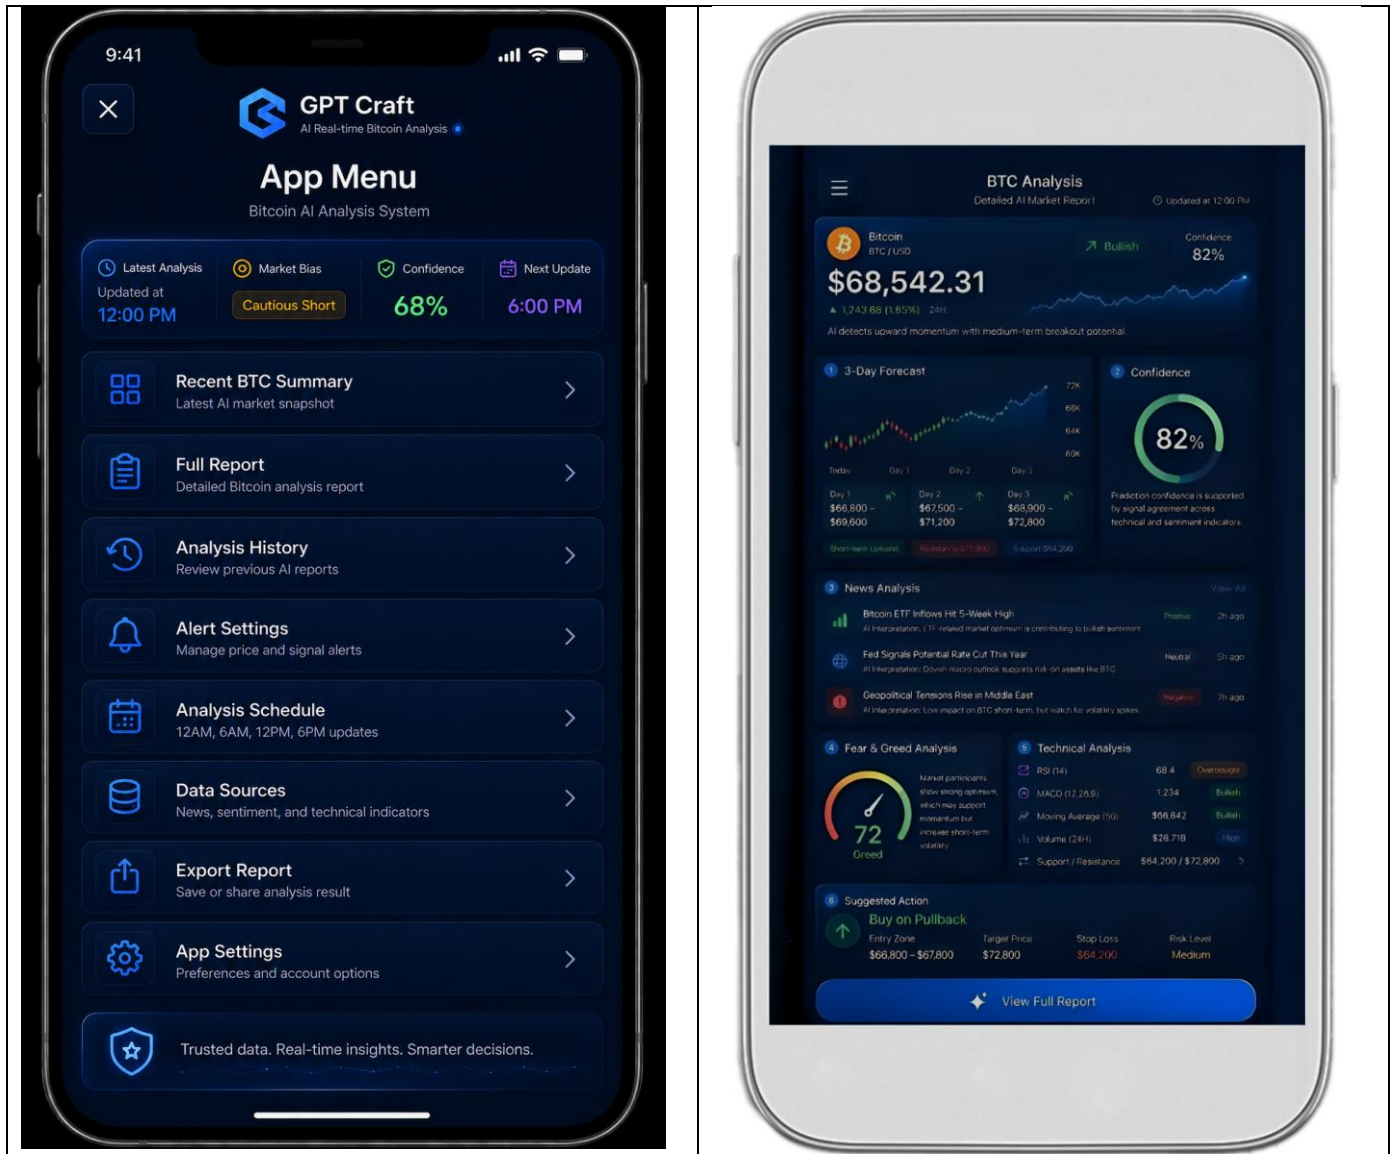

[추가 이유]

- 메뉴 아이콘을 눌렀을 때 이동할 앱 전체 메뉴 화면 후보가 필요하다고 판단했다.

[결과 차이 / 개선점]

- 기존 리포트 목차형 메뉴 대신 Analysis History, Alert Settings, Data Sources, Export Report, App Settings 등 앱 전체 기능을 보여주는 메뉴 화면으로 정리했다.

디자인 목업안

최종 3 장 제출 구조를 보조하는 Figma 연결 화면 (추가)

2. 최종 Figma 연결 계획

- 화면 1 Start Analysis 클릭 → 화면 2 Recent BTC Summary
- 화면 2 상단 메뉴 아이콘 클릭 → 화면 4 App Menu 후보 화면
- 화면 2 View Full Report 클릭 → 화면 3 BTC Full Report
- 화면 3 Back 버튼 클릭 → 화면 2 Recent BTC Summary
- 화면 4 X 버튼 클릭 → 화면 2 Recent BTC Summary
